PROFESSIONAL SUMMARY

Finance professional with an MBA and over three years of progressive FP&A experience in budgeting, forecasting, variance analysis, and cross-functional financial reporting. Proven ability to build financial models and Power BI dashboards that translate complex data into clear guidance for senior leaders. Background spans corporate finance, institutional reporting, and commercial real estate, with consistent exposure to tight close timelines and audit requirements. Currently pursuing CPA designation. Detail-oriented, collaborative, and committed to using finance as a tool for meaningful operational impact.

CORE COMPETENCIES

FP&A	Budgeting, Forecasting, Variance Analysis (A/B/F), Annual Operating Plans, Strategic Planning Support
Reporting & BI	Power BI Dashboards, Advanced Excel, Automated Reporting, Financial Modeling, MD&A
Collaboration	Cross-functional Business Partnering, Senior Management Presentations, Stakeholder Communication
Process Improvement	Workflow Automation, Forecasting Accuracy Improvements, Scalable Process Design, Data Integrity

WORK EXPERIENCE

Royal Pacific Group – Finance Associate

Jan 2026 – Present

- Build and maintain financial models for commercial real estate acquisitions, including DCF analysis, cost forecasting, and scenario planning to support operating budget decisions and track performance against targets.
- Prepare structured financial reports and investment memos for senior leadership, communicating financial results clearly and linking analysis to strategic decision-making.
- Conduct financial reconciliations across multiple data sources, identifying and resolving discrepancies proactively to maintain data integrity before reporting cycles close.

New York Institute of Technology – FP&A Analyst

Jan 2025 – Jan 2026

- Supported end-to-end monthly and quarterly financial close, including GL reconciliations, journal entries, and balance sheet tie-outs across multiple entities, consistently meeting tight reporting deadlines.
- Produced monthly, quarterly, and annual variance reports (Actual vs. Budget vs. Forecast) with written commentary, identifying key drivers and surfacing actionable insights for MD&A inputs reviewed by senior management.
- Built Power BI dashboards consolidating financial and operational data from 6–8 departments, eliminating manual consolidation effort and improving real-time visibility into budget performance across the organization.
- Partnered with 6–8 department leads to gather forecast inputs, explain variances, and align budget expectations, acting as a trusted financial business partner across non-finance functions.

Auto Pulse India – Finance Analyst

Sept 2023 – Aug 2024

- Built cash flow forecasting models and automated reconciliation templates in Excel, resolving over \$20K in transaction discrepancies and improving reconciliation accuracy by 20%, directly enhancing forecasting reliability.

- Designed Power BI dashboards tracking loan portfolio performance and delinquency metrics, giving management a real-time view of financial health to support budget planning and cost forecasting decisions.
- Proactively identified process improvement opportunities in reconciliation and reporting workflows, proposing and implementing changes that reduced manual effort and improved data accuracy across finance operations.

Finova Capital – Financial Operations Associate

May 2022 – Aug 2023

- Designed Excel-based reporting and reconciliation templates that saved 8 hours per week and reduced error rates by 20%, creating a scalable process improvement adopted across the finance team.
- Performed quarterly ratio analysis and financial benchmarking, distilling large data sets into concise summaries to support planning cycles and inform stakeholder decision-making.
- Reconciled bank accounts and transaction records on a recurring basis, flagging inconsistencies before reporting cycles closed to ensure accuracy and integrity of financial data across systems.

JPMorgan Chase – Finance Intern

Feb 2022 – Apr 2022

- Prepared financial working papers, sensitivity analyses, and scenario models for 5+ client accounts, translating complex data into clear summaries that supported advisor decision-making.
- Coordinated across internal teams to gather and validate financial data, delivering audit-ready documentation on deadline and building strong habits around accuracy and detail from the outset of my career.
